

Celebrating 10 Years of Excellency

LEGACY BEYOND

"The stories behind success "

Ten years ago, a few people backpacked a small journey. Here we are in 2021, completing 10 years of that journey with thousands of memories while climbing rough mountains, going through storms and hard times with faces filled with smiles, lives filled with experiences where we have built up ourselves through serving the undergraduate community at large.

SEP 17, 2021

What is Legacy Beyond

Legacy Beyond marks the 10th year milestone of this journey. The IESL student chapter of University of Moratuwa is proudly celebrating its 10 years of excellence this year. Even amidst a revolutionary life moment during a global pandemic situation we, future headmen of the chapter are not willing to let this milestone pass away without giving an insight to the younger explorers about this wonderful journey.

The 'Legacy beyond' is the novel initiative proposed on behalf of celebrating the 10th anniversary where we create a platform to share engineering life episodes of notable seniors for young engineering undergraduates through a magazine. Some selected individuals will be penning down their adventurous stories in the field of engineering for us and we are bringing them forth through the magazine for all the enthusiastic undergraduates while paving the path to discovering their true desires and inner potential as future engineers.

OUR OBJECTIVES FOR LEGACY BEYOND

- Encouraging youngsters to pursue their dream of being successful engineers.
- Helping the younger generation to identify their inventiveness and creativity while helping them to grow as professionals.
- Offering a major platform for young engineers to share their success stories.
- Providing a platform to the chapter members to sharpen their unique skills and innovative ideas through the process of creating the magazine.
- Appreciating all dignitaries behind the journey of the IESL Student Chapter of University of Moratuwa.
- Appreciating EVOTECH technical article competition winners.
- Launching the official website of the Chapter.

Project Plan

15th of september	Launching the project
20th of september	Collecting greeting messages from all dignities
22nd of september	Beginning to collect articles from young engineers
25th of september	Requesting for partnership
30th of september	Confirming partnership
08th of October	Finalizing the magazine
10th of October	Ceremony of 10th years of excellency
